- 6 Unless otherwise stated, documentation labels have not been included within this document, but are available as an additional (but not mandatory) linkbase. They are also available as a separate Microsoft Excel® spreadsheet included within the IFRS Taxonomy files.

### **XBRL properties**

- 7 This document does not provide the full list of XBRL properties for the line items and members listed. If you require further information on the XBRL properties applied to an element or table, please see the IFRS Taxonomy files and associated documentation.

### **Reading this update**

## ***Agriculture: Bearer Plants (Amendments to IAS 16 and IAS 41)***

### **Introduction**

- 15 *Agriculture: Bearer Plants* (Amendments to IAS 16 and IAS 41), issued in June 2014, amended the scope of IAS 16 *Property, Plant and Equipment* to include bearer plants. The amendments define a bearer plant and require bearer plants to be accounted for as property, plant and equipment in accordance with IAS 16.
- 16 Consequently, paragraph 37 of IAS 16 was amended to include bearer plants in the list of examples of separate classes of property, plant and equipment. The corresponding IFRS Taxonomy elements were created.
- 17 The effective date for the amendments is 1 January 2016, which has been indicated in the references of the related IFRS Taxonomy elements. Earlier application of the amendments, and therefore use of the IFRS Taxonomy elements, is permitted.

## ***Equity Method in Separate Financial Statements (Amendments to IAS 27)***

### **Introduction**

---

- 20 *Equity Method in Separate Financial Statements* (Amendments to IAS 27), issued in August 2014, amended the meaning of the term ‘separate financial statements’ in IAS 27 *Separate Financial Statements*.
- 21 The amended definition states that:
- separate financial statements are those presented by an entity in which the entity could elect, subject to the requirements in this Standard, to account for its investments in subsidiaries, joint ventures and associates either at cost, in accordance with IFRS 9 *Financial Instruments*, or using the equity method as described in IAS 28 *Investments in Associates and Joint Ventures*.
- 22 The documentation label of the IFRS Taxonomy member representing separate financial statements was amended accordingly.
- 23 The effective date for the amendments is 1 January 2016, which has been indicated in the related IFRS Taxonomy element’s documentation label. Earlier application of the amendments, and therefore use of the IFRS Taxonomy element with the meaning represented by the amended documentation label, is permitted.

### **Amendment to the documentation label**

---

#### **Details**

- 24 For the following existing member, located in the presentation group [913000] Axis—Consolidated and separate financial statements, the documentation label has been amended:

Element	Current documentation label	Amended documentation label
Separate [member]	This member stands for separate financial statements. Separate financial statements are those presented by a parent (ie an investor with control of a subsidiary) or an investor with joint control of, or significant influence over, an investee, in which the investments are accounted for at cost or in accordance with IFRS 9.	Expiry date 2016-01-01: This member stands for separate financial statements. Separate financial statements are those presented by a parent (ie an investor with control of a subsidiary) or an investor with joint control of, or significant influence over, an investee, in which the investments are accounted for at cost or in accordance with IFRS 9. Effective 2016-01-01: This member stands for separate financial statements. Separate financial statements are those presented by an entity in which the entity could elect, subject to the requirements in IAS 27, to account for its investments in subsidiaries, joint ventures and associates either at cost, in accordance with IFRS 9, or using the equity method as described in IAS 28.

- 25 While various options were considered, it was decided to continue providing a single documentation label that will comprise both definitions, prefixed with the effective and expiry dates. Such an approach will not require any changes to the preparation of financial statements using the IFRS Taxonomy and their consumption. Other potential solutions, such as creating two separate documentation labels, do not seem to offer any significant benefits in comparison to the current approach.

## ***Annual Improvements to IFRSs 2012-2014 Cycle***

### **Introduction**

---

- 26 *Annual Improvements to IFRSs 2012-2014 Cycle*, issued in September 2014, clarified that information required by paragraph 16A of IAS 34 *Interim Financial Reporting*:
- shall be given either in the interim financial statements or incorporated by cross-reference from the interim financial statements to some other statement (such as management commentary or risk report) that is available to users of the financial statements on the same terms as the interim financial statements and at the same time.
- 27 Consequently, a new line item was added to the IFRS Taxonomy to enable entities to tag the disclosure of the cross-reference.
- 28 The effective date for the amendments is 1 January 2016, which has been indicated in the reference of the related IFRS Taxonomy element. Earlier application of the amendments, and therefore use of the IFRS Taxonomy element, is permitted.

## Annual improvements to the IFRS Taxonomy

### Introduction

---

- 30 Most changes to the IFRS Taxonomy result from the new or amended Standards issued by the IASB and from the incorporation of the effects of the common practice analysis. However, the IFRS Taxonomy is also annually updated to include elements missing from the previous releases or to correct the existing elements' labels and references.
- 31 New line items were added to the IFRS Taxonomy to represent the disclosures required by Appendix E *Short-term exemptions from IFRSs* to IFRS 1 *First-time Adoption of International Reporting Standards*. These disclosures had been incorrectly omitted from the previous versions of the IFRS Taxonomy.
