Resilient Business, Shaping the Future: Promoting High-quality Adoption and Application of ISSB Standards Across Borders

About Us

The IFRS Foundation is a not-for-profit, public interest organisation. The International Sustainability Standards Board (ISSB) is an independent standard-setting body within the IFRS Foundation. IFRS Sustainability Disclosure Standards are developed to enhance investor-company dialogue so that investors receive decision-useful, globally comparable sustainability-related disclosures that meet their information needs.

26 June 2023, issued its inaugural standards—IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures.

Over 40 jurisdictions have already decided to use or are taking steps to introduce ISSB Standards in their legal or regulatory frameworks. Together, these jurisdictions account for about 60% of global GDP.
