Income Tax	68	200	267
Profit for the year	197	584	781

Refer to Appendix B-2 for transposition

NOTE: This example presents an expanded margin approach. Revenue is recognized on a due basis. Policyholder(unit-linked) accounts are not included. The line "change in insurance liability" offsets the volume information (premium due, claims, expenses, amort. of acq. costs) in order to remove duplicate accounting of these items which is recorded in the release of margins over time.

{alpha} traces numbers to the transposition shown in Appendix B.

	APPENDIX A-4b Expanded Margin Approach (alternative grouping)			
	Modified Approach		Building Block Approach	Total
Premium due	2,139	AA	6,392 C	8,532

Investment fair value changes				
Net Investment Remeasurements	-		-	-
Income Tax	68		200	267
Profit for the year	197		584	781

Refer to Appendix B-2 for transposition

NOTE: This example presents an alternative grouping of the expanded margin approach to include all items impacting the measurement of the insurance contract (the present value of the expected cash flows) shown in Appendix A-3. The numbers on the left of certain line items illustrate the changes when compared to A-2 and A-4.

Another alternative grouping suggested proposes including line #5 (changes in discount rate) separately with investment fair value changes to isolate the components of the presentation responsible for volatility concerns. For consistency, line "net investment remeasurements" was not changed in examples where it is not applicable.

(alpha) traces numbers to the transposition shown in Appendix B.

APPENDIX A-4c - Expanded margin approach alternate grouping w/ separate accounting for policyholder accounts

Refer to Appendix B-2 for transposition

NOTE: This example includes "premiums" and "claims" for policy holder accounts (i.e. unit linked, segregated accounts, separate accounts, etc).

Another alternative grouping suggested proposes including line #5 (changes in discount rate) separately with investment fair value changes to isolate the components of the presentation responsible for volatility concerns. For consistency, line "net investment remeasurements" was not changed in examples where it is not applicable.

NOTE: This example presents information on the expected cash flows of new business written separately from performance of contracts in-force at the beginning of the period. This example is intended to illustrate another approach to provide current period volume information using building block approach components.

This approach is not consistent with the modified approach as described in the ED however the modified approach is being discussed in a future Board meeting. The column heading was preserved for comparability to other examples. A building block approach is applied to both types of contracts. We assumed the residual margin on the shorter contracts (modified column) is released as time passes. For this example we assumed:

- Contracts were written evenly across the period
- All changes in estimates and other liability adjustments were applied as if they were a result of contracts previously written

**APPENDIX A-6 Dual Statement Example Approach**

Source of Earnings <sup>1</sup>	
Expected profit from in-force businesses	5,645
Impact of new business <sup>1,2</sup>	(960)
Experience gains (losses) <sup>1,2</sup>	(2,203)
Management actions and changes in assumptions	(5,219)
Earnings (loss) on surplus funds	718
Other	35,077
Income (loss) before income taxes <sup>3</sup>	(2,089)
Income tax recovery (expense)	1,436
Net income (loss) attributed to shareholders	(653)
 This is a source of earnings statement meant to show the following	
Expected profit from in-force business	Formula-driven release of PADS (Provisions for Adverse Deviations) on the non-fee businesses and expected profit on fee businesses.
Impact of new business	For non-fee income businesses, the capitalized value of future profits less PADS in respect of new business. For fee income businesses, the non-capitalized acquisition expenses.
Experience gains (losses)	Earnings impact of any differences between actual experience in the current period relative to expected experience implicit in the actuarial liabilities, and differences in current period fee income due to market performance.
Management actions and changes in assumptions	Earnings impact of: -management initiated actions in the period that generate a non-recurring current period impact -changes in methods and assumptions that impact actuarial liabilities or other liabilities -integration expenses from acquisitions that bear to income Actual investment returns on the Company's surplus (shareholder's equity).
Earnings (loss) on surplus funds	Earnings items not included in any other line of the SOE, including non-operational items.
Other	Tax charges to income, consistent with the amount on the statement of operations.
Income taxes	

Statement of Comprehensive Income	
Revenue	30,646
Premium income	15,825
Investment income <sup>1</sup>	10,054
Other revenue	5,219
Subtotal revenue	56,925
Realized/unrealized gains (losses) on assets supporting policy liabilities and consumer notes <sup>2,3</sup>	5,922
Total revenue	62,847
Policy benefits and expenses	*
To policyholders and beneficiaries	7,204
Death, disability and other claims	9,365
Maturity and surrender benefits <sup>4</sup>	5,053
Annuity payments	1,882
Policyholder dividends and experience rating refunds	1,127
Net transfers (from) to segregated funds	23,008
Change in actuarial liabilities <sup>4</sup>	6,232
General expenses	1,622
Investment expenses	6,273
Commissions	1,759
Interest expenses <sup>3</sup>	438
Premium taxes	1,725
Goodwill impairment	67
Non-controlling interest in subsidiaries	64,934
Total policy benefits and expenses	(1,552)
Income (loss) before income taxes	1,436
Net income tax recovery (expense)	(521)
Net income (loss)	132
Net income (loss) attributed to participating policyholders	(653)
Net income (loss) attributed to shareholders	(132)
Preferred share dividends	(785)
Net income (loss) available to common shareholders	

This is a traditional statement of comprehensive income used to demonstrate comparability to the source of earnings statement and would be converted to one of the approaches previously discussed.
