Projects

Priority projects

Accounting for Dynamic Risk Management: a Portfolio Revaluation Approach to Macro Hedging	The Discussion Paper is out for public comment, with comments due by 17 October 2014.
Business combinations under common control	See Agenda Paper 8B.
Disclosure initiative	See Agenda Paper 11.
Discount rates	The staff are continuing to work on this project, and have been using the analysis presented previously to the IASB as a basis for discussion with other parties.
Emissions Trading Schemes	We have allocated staff to this project, and started to work with EFRAG and IPSASB on background material. The IASB did a lot of work documenting and analysing schemes. That work is being updated. We have also started to think about emissions trading schemes (ETS) in the light of the rate regulation discussions. ETS is on the agenda at the world standard-setters meeting in London. We expect to start public discussions papers for the IASB by the end of 2014.

The IASB is the independent standard-setting body of the IFRS Foundation, a not-for-profit corporation promoting the adoption of IFRSs. For more information visit $\underline{www.ifrs.org}$

Some preliminary work has begun to assess the implications of the IASB decisions in the Conceptual Framework. We expect to bring papers to the IASB before the end of 2014.
