

IFRS Taxonomy implementation support

Rita Clijmans—Senior Technical Manager
Vivek Baid—Technical Manager
Aishat Akinwale—Technical Associate

The views expressed in this presentation are those of the presenter, not necessarily those of the International Accounting Standards Board (Board) or the IFRS Foundation.

- To seek your views and help identify possible **improvements to the IFRS Taxonomy implementation support** provided to regulators and preparers. We:
 - will focus on quick wins that can be implemented in 2018
 - welcome suggestions for new resources or activities that may be needed

Implementation support—what is it?

- Taxonomy content, technology or supporting resources and outreach activities that help **users implement the IFRS Taxonomy correctly and consistently**, for example, by:
 - helping preparers find and select the correct element
 - helping regulators understand how to customise the IFRS Taxonomy to meet local needs
 - helping investors review differences between taxonomy versions

What have you told us so far?

Educational guides for preparers and regulators
(released but now being reviewed)

Use of IFRS Taxonomy
implementation notes
(being reviewed)

Implementation guides on
specific topics
(not yet reviewed)

Collaborative digital
forum/platform moderated

IFRS Taxonomy 'tables'
reflecting common
reporting practice
(not yet reviewed)

Our focus in 2018—quick wins

- Changes:
 - we can implement quickly, with relatively few resources
 - that will provide tangible benefits to users
