
ISSB meeting

Date	November 2022
Project	General Sustainability-related Disclosures
Topic	Cover note and summary of redeliberations
Contacts	Sundip Jadeja (sjadeja@ifrs.org)

This paper has been prepared for discussion at a public meeting of the International Sustainability Standards Board (ISSB). This paper does not represent the views of the ISSB or any individual ISSB member. Any comments in the paper do not purport to set out what would be an acceptable or unacceptable application of IFRS[®] Sustainability Disclosure Standards. The ISSB's technical decisions are made in public and are reported in the ISSB *Update*.

Purpose of this meeting

1. At this meeting we will continue redeliberating the proposals in Exposure Draft IFRS S1 *General Requirements for Disclosure of Sustainability-related Financial Information* ([draft] S1), including beginning redeliberations on the requirements relating to current and anticipated effects of sustainability-related risks and opportunities on financial performance, financial position and cash flows and the connected information requirements. We will also redeliberate on the requirement to disclose comparative information that reflects updated estimates and the timing of reporting requirements.
2. We will discuss the following papers:
 - (a) Agenda Paper 3A and Agenda Paper 4B: Current and anticipated financial effects and connected information;
 - (b) Agenda Paper 3B: Comparative information and updated estimates; and
 - (c) Agenda Paper 3C: Timing of reporting.

Next Steps

3. At future ISSB meetings, we will continue redeliberating the project proposals.

Summary of redeliberations

4. The Appendix summarises the redeliberations for this project, including the ISSB's tentative decisions.

Appendix – Tentative decisions by the ISSB

A1. Feedback on [draft] S1 was summarised for the September 2022 ISSB meeting in Agenda Paper 3A *General Sustainability-related Disclosures—Summary of comments*. The ISSB tentatively agreed on the staff’s proposals on the [draft] S1 topics for redeliberation as outlined at the September 2022 ISSB meeting in [Agenda Paper 3B and 4B: General Sustainability-related Disclosures and Climate-related Disclosures—Plan for redeliberations](#).

Topic	Tentative decisions by the ISSB
Scalability / proportionality	<p>September 2022: AP3C and AP4C General Sustainability-related Disclosures and Climate-related Disclosures—Scalability</p> <p>The ISSB tentatively decided that mechanisms should be identified to enable disclosure requirements to be scalable, when relevant. In particular, the ISSB considered whether:</p> <ul style="list-style-type: none"> (a) to amend the proposed disclosure requirements so that an entity, based on specific criterion related to scalability, would not be required to provide a particular disclosure (or would be required to provide an alternative disclosure that is simpler to apply); (b) to amend the proposed disclosure requirements so that an entity that meets a criterion of being unable to provide a disclosure is required to explain how it meets the criterion; (c) to provide materials to assist preparers in the application of the standards, which include the ISSB providing guidance to support application; (d) to provide materials to assist preparers in the application of the standards, which include referring to other sustainability-related protocols, frameworks and guidance as resources for further guidance, measurement methodologies and inputs to calculations to support application; and (e) to amend the proposed disclosure requirements to differentiate the application by entities, by identifying requirements that are ‘basic’ and ‘advanced’ that could be utilised by a jurisdiction for a transition period. <p>The ISSB tentatively decided on factors to assess which scalability mechanisms are appropriate for responding to specific scalability challenges:</p> <ul style="list-style-type: none"> (a) whether the scalability challenges are temporary (in other words transitional) or more permanent (for example, due to data availability);

	<ul style="list-style-type: none"> (b) the extent to which the set of entities with a scalability challenge can be specifically identified; (c) the extent of available market guidance, methods, industry-practices and techniques; and (d) the maturity of the underlying methods and techniques that underpin the disclosure requirement.
<p>Current and anticipated effects of sustainability-related and climate-related risks and opportunities on an entity's financial performance, financial position and cash flows</p>	<p>This topic is yet to be redeliberated.</p>
<p>Fundamental concepts, including enterprise value; breadth of reporting required; 'significant' sustainability-related risk or opportunity; identifying significant sustainability-related risks and opportunities and disclosures (including using the materials of other standard-setters); and application of materiality assessment</p>	<p>October 2022: AP3B General Sustainability-related Disclosures—Fundamental Concepts</p> <p>The ISSB tentatively agreed that:</p> <ul style="list-style-type: none"> (a) the purpose of draft S1 is to require entities to meet the information needs of the primary users of general purpose financial reporting; (b) 'material' in draft S1 shares the same definition as that used in IFRS Accounting Standards; and (c) the definitions of 'value chain' and 'reporting entity' as proposed in draft S1 should remain unchanged. <p>The ISSB also tentatively decided:</p> <ul style="list-style-type: none"> (a) to amend draft S1 by removing the definition of 'enterprise value' and the words 'to assess enterprise value' from the objective and description of materiality, while planning to continue to redeliberate the meaning of 'enterprise value' at a future meeting (in particular, how the term could be more clearly articulated and how it is related to material sustainability-related financial information); and (b) to remove the word 'significant' from the proposed requirements to describe which sustainability risks and opportunities an entity would be required to disclose, while continuing to redeliberate the application of materiality and the process used by preparers to identify an entity's sustainability-related risks and opportunities in order to provide useful information to primary users.

	<p>October 2022: AP3C and AP4D General Sustainability-related Disclosures and Climate-related Disclosures—Interoperability</p> <p>The ISSB tentatively confirmed:</p> <ul style="list-style-type: none"> (a) the use of the four pillars, described by the Financial Stability Board’s Task Force on Climate-related Financial Disclosures, to structure the core content of the disclosure requirements proposed in draft S1 and draft S2—that is, information will be required on governance; strategy; risk management; and metrics and targets; and (b) the meaning of the global baseline—in particular, that the proposed disclosures that IFRS Sustainability Disclosure Standards would require an entity to make are designed to meet the information needs of investors, creditors and other lenders; that the information to be provided in such disclosures is subject to an assessment of materiality; and that the information can be presented with information disclosed to meet other requirements, such as specific jurisdictional regulatory requirements, but cannot be obscured by that additional information. <p>The ISSB also tentatively decided:</p> <ul style="list-style-type: none"> (a) confirm that the purpose of the proposed disclosure requirements would be to meet the information needs of the primary users of general purpose financial reporting (see Agenda Paper 3B); (b) to remove the definition of ‘enterprise value’ that was included in draft S1, and to remove the words ‘to assess enterprise value’ from the draft S1 objective and description of materiality (see Agenda Paper 3B); (c) to confirm that, consistent with draft S1 and draft S2, short-, medium- and long-term time horizons are not defined; and (d) to confirm the definition of ‘value chain’ that was proposed in draft S1 (see Agenda Paper 3B). <p>1-3 November 2022: AP3 General Sustainability-related Disclosures—Sources of guidance to identify sustainability-related risks and opportunities and disclosures</p> <p>At the time of writing, this ISSB session was yet to occur. Please refer to the ISSB Update.</p>
