Purpose of the paper

1. This paper provides an update on the IASB’s work plan since its last update in May 2022.

2. The purpose of this paper is to provide a holistic view of the IASB’s technical projects to support:

   (a) decisions about whether to add or remove projects, as may be discussed in individual project papers.

   (b) assessment of overall progress on the work plan, including project prioritisation and timing.

3. This paper does not ask the IASB to make any decisions.

4. The staff expects to provide the next work plan update in around three or four months.

Structure of the paper

5. This paper is structured as follows:

   (a) completed projects (paragraph 6-8);

   (b) new projects (paragraphs 9–13);

   (c) current projects (paragraphs 14–17); and

   (d) question for the IASB.

Completed Projects

6. In February 2022, the IASB completed the Post-implementation Review of IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements and IFRS 12 Disclosures of Interests in Other Entities and concluded that the Accounting Standards are working as intended. The IASB published the Report and Feedback Statement in June 2022.

7. In April 2022 the IASB concluded its deliberations on its Third Agenda Consultation. In July 2022 the IASB published a feedback statement summarising the feedback on the Request for Information and the IASB’s activities and work plan for 2022 to 2026.

8. The IASB did not object to the following Agenda Decisions:
(a) in May 2022, Principal versus Agent: Software Reseller (IFRS 15);
(b) in July 2022, Transfer of Insurance Coverage under a Group of Annuity Contracts
   (IFRS 17);
(c) in July 2022, Special Purpose Acquisition Companies (SPAC): Classification of Public
   Shares as Financial Liabilities or Equity (IAS 32); and
(d) in July 2022, Negative Low Emission Vehicle Credits (IAS 37)

New Projects

9. In May 2022 the IASB decided to add a high-priority project to clarify particular aspects of the
   requirements for assessing a financial asset’s contractual cash flow characteristics, based on
   feedback on the post-implementation review of the classification and measurement requirements in
   IFRS 9 Financial Instruments.

10. In July 2022, the IASB decided to add a standard-setting project to its research pipeline to clarify the
    requirements in IFRS 9 for modifications of financial assets and liabilities and applying the effective
    interest method.

11. Regarding post-implementation reviews (see further discussion in agenda paper 8A for this
    September meeting):

    (a) in July 2022, the IASB began the post-implementation review of the impairment
        requirements in IFRS 9;
    (b) in agenda paper 6 for this September meeting, the staff will present its plan to begin the
        post-implementation review of IFRS 15 Revenue from Contracts with Customers, and
    (c) in agenda paper 8B for this September meeting, the staff will present its updated
        considerations of when to begin the post-implementation reviews of the hedge accounting
        requirements in IFRS 9 and of IFRS 16 Leases.

12. At a future meeting, the IASB will be asked whether to start any of the projects on its pipeline, listed in
    Table 1 below and described here. Consistent with discussions as part of the IASB’s Third Agenda
    Consultation, the start date of these projects depends on stakeholder and IASB capacity, and the
    nature of the projects.

13. The staff are also investigating implications of jurisdictional adoption of the OECD’s Pillar Two Model Rules, which reform international corporate taxation. That investigation includes considering whether urgent amendments to IFRS Accounting Standards might be needed concurrent with substantive enactment of tax legislation.

Current Projects
14. In May 2022 the IASB met for final deliberations on the Dynamic Risk Management project and decided to move the project from its research programme to its standard-setting programme.

Expected Final Amendments in H2 2022
15. In February 2022 the IASB confirmed that it had complied with the applicable due process requirements and undertaken sufficient consultation and analysis to begin the process for balloting the amendments proposed in the Exposure Draft Lease Liability in a Sale and Leaseback. The IASB expects to issue the amendments to IFRS 16 Leases in September 2022.
16. In July 2022 the IASB confirmed that it had complied with the applicable due process requirements and undertaken sufficient consultation and analysis to begin the process for balloting the amendments proposed in the Exposure Draft Non-current Liabilities with Covenants. The IASB expects to issue the amendments to IAS 1 Presentation of Financial Statements in November 2022.

Consultation documents
17. In September 2022, the IASB published an exposure draft of the third edition of the IFRS for SMEs Accounting Standard. The comment period ends on 7 March 2023.

Question for the IASB
