
Sustainability Standards Advisory Forum meeting

Date	May 2026
Project	Enhancing the SASB Standards
Topic	Update on Exposure Draft and latest outreach activities
Contacts	Benoit Cheron (benoit.cheron@ifrs.org) Greg Waters (greg.waters@ifrs.org)

This paper has been prepared for discussion at a public meeting of the Sustainability Standards Advisory Forum (SSAF). This paper does not represent the views of the International Sustainability Standards Board (ISSB) or any individual ISSB member. Any comments in the paper do not purport to set out what would be an acceptable or unacceptable application of IFRS[®] Sustainability Disclosure Standards. The ISSB's technical decisions are made in public and are reported in the ISSB *Update*.

Purpose of this session

Purpose of this session

- Provide SSAF members with an update regarding the project to enhance the SASB Standards
- Seek initial feedback from SSAF members on the Exposure Draft *Proposed Amendments to the SASB Standards and IFRS S2 Industry-based Guidance* published in March 2026

Questions for SSAF members

- Have SSAF members received any initial feedback from their stakeholders on the Exposure Draft?
- What engagement activities have SSAF members performed to date regarding the Exposure Draft?
- Do the SSAF members have any suggestions for how to most effectively collaborate during the consultation?

Project update – Enhancing the SASB Standards

Update:
July 2025 Exposure Draft

ISSB sessions regarding July 2025 ED

- **February 2026:** ISSB decision to continue executing the project on Enhancing the SASB Standards as set out in the ISSB's 2024–2026 work plan
- **March 2026:**
 - ISSB discussion of feedback on project objective and overall approach, including proposed 'targeted amendments' across 41 SASB Standards
 - SSAF session including discussion of SSAF members' feedback on project strategy and next steps
- **May 2026 (expected):** Discussion of detailed feedback on Extractives & Minerals Processing sector and Processed Foods SASB Standards
- Future sessions: ISSB discussions and redeliberation on key matters identified through stakeholder feedback

Exposure Draft published
March 2026: *Proposed
Amendments to the SASB
Standards and IFRS S2
Industry-based Guidance*

Now open: Consultation on three SASB Standards

The proposed amendments:

- cover three SASB Standards prioritised by the ISSB for enhancement:

Agricultural Products

Electric Utilities & Power Generators

Meat, Poultry & Dairy

- include consequential amendments to the IFRS S2 Industry-based Guidance
- are consistent with the ISSB's July 2025 Exposure Draft of proposed amendments to the SASB Standards

To participate:

1. Access the [Exposure Draft and Basis for Conclusions](#)

2. Submit your comments using the online survey before **24 July 2026**

Respondents may also submit a comment letter by sending a PDF letter via email to commentletters@ifrs.org.

Proposed updates: Electric Utilities Standard

Highlights

New disclosure topics

In response to initial investor and preparer input, proposes new disclosure topics:

- ecological impacts
- community relations and rights of Indigenous Peoples
- employee recruitment, development and retention
- supply chain management

Revised topic scopes

Expands existing topics to improve relevance across different segments of the industry:

- coal ash management → *hazardous waste management*
- end-use efficiency and demand → *demand-side management*
- nuclear safety and emergency management → *critical incident risk management*

Improved metrics

Revises metrics to enhance decision-useful information for investors:

- GHG emissions and energy resource planning
- air quality
- water management
- energy affordability
- workforce health and safety
- operational resilience and system reliability (proposed renaming of grid resiliency)

Proposed updates: Agricultural Products Standard

Highlights

Industry scope

Expansion of industry classification to include **direct farming activities** to reflect business models in emerging markets and developing economies

New disclosures

New topics and metrics regarding:

- food loss & food waste
- land use & ecological impacts (in direct farming activities)
- labour conditions (in direct farming activities)

Improved metrics

Revised metrics to enhance decision-useful information for investors, including:

- greenhouse gas emissions
- energy management
- water management
- food safety
- workforce health and safety

Cost-effectiveness

Removal of GMO Management disclosure topic and metric

Revised approach to supply chain disclosures

Reorganises disclosure topics and replaces metrics with ones that better capture risks and opportunities related to:

- deforestation
- sensitivity of products to nature- and climate-related physical risks
- sustainable agriculture practices
- traceability of sourced products
- environmental and social due diligence

Proposed updates: Meat, Poultry & Dairy Standard

Highlights

New disclosures

- Methane emissions
- New disclosure topic and metric regarding **Product Innovation**

Improved metrics

Revised metrics to enhance decision-useful information for investors:

- greenhouse gas emissions
- energy management
- water management
- land use and ecological impacts
- food safety
- antibiotic use
- workforce health and safety
- animal care and welfare

Revised approach to supply chain disclosures

Reorganises disclosure topics and replaces metrics with ones that better capture risks and opportunities related to:

- deforestation
- sensitivity of products to nature- and climate-related physical risks
- nutrient management
- traceability of sourced products
- environmental and social due diligence

Outreach: main objectives

1

Gather **useful technical input** that:

- ✓ *improves the quality of the SASB Standards*
- ✓ *draws on a diverse range of perspectives and experiences, including the views from investors, preparers, public and regional or industry organisations*

2

Continue to **build understanding** of how SASB Standards:

- ✓ *support cost-effective application of ISSB Standards, particularly for stakeholders and jurisdictions less familiar with them*
- ✓ *help preparers identify sustainability-related risks and opportunities and disclose material information about them*

Overview of approach to outreach activities

Approach

- **Multi-channel approach** to outreach - bilateral meetings, industry association / regulatory roundtables, one-to-many format
- Leverage members of the consultative bodies of the ISSB, contacts established during the research phase, and respondents to the 2025 consultation
- Collaborate with stakeholders (including SSAF members) to organise meetings and identify attendees with relevant experience and expertise in prioritised industries

Roundtables have proven to be an effective format which can serve as a foundation for engagement and catalyse informed, useful feedback. The ISSB can then follow-up with individuals and convening groups to solicit responses to the consultation.

Current activities

- Public webinar *to present the key aspects of the exposure draft and facilitate survey responses*
- Bilateral meetings with stakeholders *to engage on specific aspects of the exposure draft and technical comments*
- Roundtables and presentations *to industry and investor associations to catalyse comments*
- *Ad hoc* meetings with organisations and their members *regarding specific questions*

Examples: a national standard-setter is hosting a roundtable to present the main comments from a working committee and to address open questions. In another meeting, a group of preparers will receive a briefing from a national standard-setter on the exposure draft and provide preliminary feedback.

Next steps

Staff and ISSB members will continue with outreach and engagements through close of the comment period on **24 July 2026**

Available resources

- [Exposure draft](#)
- [Basis for Conclusions](#)
- [Online survey](#)
- Individual versions of the [proposed SASB Standards with no markup](#)
- **Under development:**
 - Industry snapshots—summarising the context and key elements of the proposed amendments for each industry
 - Translated versions of materials in Japanese, Simplified Chinese, Korean, French and Spanish

Please contact the Technical staff if you are interested in setting up joint outreach activities.

Contact information for relevant members of the ISSB Technical Staff is available on the cover slide of this presentation.
