This paper has been prepared for discussion at a public meeting of the Capital Markets Advisory Committee (CMAC). This paper does not represent the views of the International Accounting Standards Board (IASB) or any individual IASB member. Any comments in the paper do not purport to set out what would be an acceptable or unacceptable application of IFRS<sup>®</sup> Accounting Standards. The IASB's technical decisions are made in public and are reported in the IASB<sup>®</sup> Update.

| Appendix A—IASB’s proposed disclosures for non-cash transactions | 6–8 |

## Background

|                                                   | <b>Payments on behalf of an entity</b>                                                                                          | <b>Deferred payments</b>                                                                               | <b>Liabilities assumed in a business combination</b>      |
|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|-----------------------------------------------------------|
| <b>Reporting matter</b>                           | Diversity in reporting and classifying such payments and related cash flows (e.g. supplier finance and factoring arrangements). | Disclosure of non-cash transactions for payments for long-term assets purchased on credit              | Scoping the non-cash components of a business combination |
| <b>Source of feedback</b>                         | Accounting firms, regulators, standard-setters and IFRS Interpretations Committee                                               | Standard-setters                                                                                       | IASB discussion in July 2026.                             |
| <b>Link with non-cash transaction disclosures</b> | Whether third-party payments constitute cash flows or represent a non-cash transaction.                                         | Interaction between disclosing non-cash acquisition of asset and classifying payment in the statement. | The flows to disclose in the new proposed disclosures.    |

---

## Meeting material

Due to the link of the first two topics on **slide 3** to the IASB's broader work to improve disclosures for non-cash transactions from investing and financing activities, the IASB planned to address these topics after it reached decisions about proposed new disclosures.

In July 2026 the IASB reached tentative decisions on the disclosures for non-cash transactions (see **Appendix A, slides 6–8**). During that discussion, the IASB also identified the third question on **slide 3** about the disclosable non-cash components for business combinations.

We therefore now consider three related matters in this session—each in a separate set of slides:

|   |                                                                 | Time<br>allocation |
|---|-----------------------------------------------------------------|--------------------|
| 1 | Payments on behalf of an entity (Agenda Paper 4B)               | 30                 |
| 2 | Payment arrangements with a supplier (Agenda Paper 4C)          | 30                 |
| 3 | Liabilities assumed in a business combination (Agenda Paper 4D) | 15                 |

---

## Purpose of this session

In each presentation we ask for your views on whether the IASB's proposed disclosures for non-cash transactions give investors the information they need. Specifically, we ask whether and how the proposed disclosures provide sufficient transparency about:

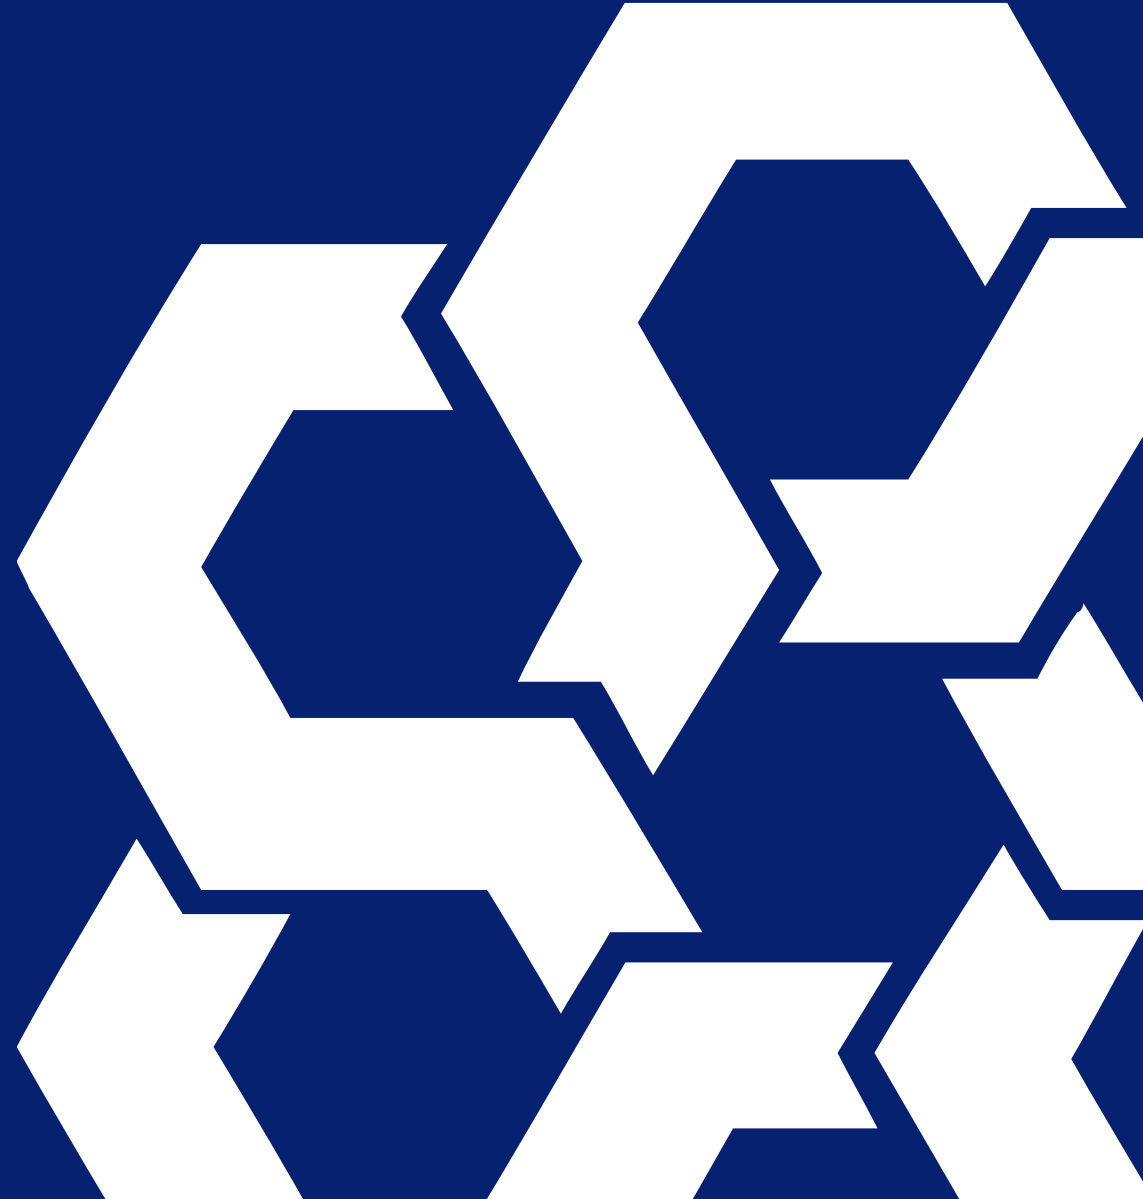

- payments and receipts made on behalf of an entity;
- flows from deferred payment arrangements; and
- components of a business combination.

### **How we plan to use your feedback**

Your insights will help the IASB decide what to propose in an exposure draft.

---

## Appendix A—IASB's proposed disclosures for non-cash transactions

## Disclosures of non-cash transactions (July 2026 Agenda Paper 20A)

- Non-cash transactions do not result in cash flows, so they are **excluded from the statement of cash flows**.
- Some stakeholders would like to include them in the statement. However, they are excluded because it **reduces complexity of the statement and preserves its objective**—information about a company's cash receipts and payments during a period.

### July 2026 tentative decisions—proposals for disclosures to improve information about non-cash transactions

#### What to disclose

- A list of non-cash transactions from investing and financing activities, cross-referenced to the related notes.  
**B** — the transaction amount and the related investing, financing or operating activities.  
**A** — the effect on assets, liabilities and equity, alongside similar cash transactions.  
**C = A + B** — the combined effect of both types of transactions.

#### Structure and location

- Give the information in a **single note** and in a structured format, such as a table.
- Explain the nature of the **cross-referenced** information where the transaction amounts are not separately identifiable in other notes.

**A, B and C are the columns used in the illustrative examples in the three presentations for this session.**

## Example of possible non-cash transactions disclosure

| Activities and line items of similar cash transactions in statement of cash flows (SCF) | A—Amounts in SCF | B—Additions of right-of-use assets from new leases | B—Grant of shares under share-based payment plan | C—A + B        |
|-----------------------------------------------------------------------------------------|------------------|----------------------------------------------------|--------------------------------------------------|----------------|
| <b>Operating activities, include</b>                                                    | <b>1,650</b>     |                                                    | <b>(100)</b>                                     | <b>1,550</b>   |
| Operating profit (after adjustments for non-cash)                                       | 3,840            |                                                    | (100)                                            | 3,740          |
| <b>Investing activities, include</b>                                                    | <b>(480)</b>     | <b>(900)</b>                                       |                                                  | <b>(1,380)</b> |
| Purchase of property, plant and equipment                                               | (350)            | (900)                                              |                                                  | (1,250)        |
| <b>Financing activities, include</b>                                                    | <b>(1,060)</b>   | <b>900</b>                                         | <b>100</b>                                       | <b>(60)</b>    |
| Issue of share capital                                                                  | 250              |                                                    | 100                                              | 350            |
| Increase in long-term borrowings                                                        | 250              | 900                                                |                                                  | 1,150          |

Note L includes more information about the Group's leases and Note S about the nature and extent of the Group's share-based payment arrangements.
