

Embedding IFRS Accounting Standards into research and workflow platforms

Real world use-case

THE CHALLENGE

Accounting professionals across the Nordics needed fast and reliable access to authoritative IFRS guidance—without switching between multiple sources, languages and documents. Fragmented access increased research time and risked inconsistent interpretation.

THE SOLUTION

DIBkunnskap **licensed IFRS Accounting Standards** and annotations and embedded them into a dedicated IFRS module within its platform. The solution integrates:

- 01 Local accounting rules used alongside IFRS Standards
- 02 EU translations for bilingual access
- 03 Embedded access to IFRS content within checklists and workflows

WHY LICENSING IFRS CONTENT MATTERS

- Official content direct from the source
- Always up to date as standards change
- Legal certainty for commercial use
- Digital-ready formats for structured access

THE IMPACT

- Reduced research time and workflow disruption
- Increased accuracy through authoritative IFRS Standards content
- Greater user confidence and trust in the platform

“Having trusted IFRS content in our solution gives us the credibility we need and the confidence our customers expect.”
