

Powering disclosure software with official IFRS Accounting Standards

Real world use-case

THE CHALLENGE

Ideagen's disclosure management software depends on precise, authoritative accounting requirements. Using unofficial or secondary sources would undermine trust, accuracy and regulatory confidence—putting their product at risk.

THE SOLUTION

Ideagen **licensed IFRS Accounting Standards** and embedded official disclosure requirements directly into its Ideagen Disclose software. The standards underpin:

- 01 Entity-specific disclosure checklists
- 02 Tailored logic based on jurisdiction and accounting framework
- 03 Embedded technical guidance derived from the source: IFRS Accounting Standards

WHY LICENSING IFRS CONTENT MATTERS

- Global recognition across 140+ jurisdictions
- Structured digital content for software integration
- Automatic updates as standards change
- Confidence for regulated and audited environments

THE IMPACT

- Trusted disclosure requirements sourced directly from Accounting Standards
- Long-standing adoption by leading audit and accounting firms
- A viable, market-leading compliance solution

“Without IFRS licensing, we wouldn't have a product. Our clients trust us because they know the standards come straight from the source.”
