Proposed Update 1

International Tax Reform — Pillar Two Model Rules, Supplier Finance Arrangements and Lack of Exchangeability

Comments to be received by 4 December 2023
IFRS® Accounting Taxonomy 2023—Proposed Update 1 International Tax Reform—Pillar Two Model Rules, Supplier Finance Arrangements and Lack of Exchangeability is published by the International Accounting Standards Board (IASB) for comment only. Comments need to be received by 4 December 2023 and should be submitted by email to commentletters@ifrs.org or online at https://www.ifrs.org/projects/open-for-comment/.

All comments will be on the public record and posted on our website at www.ifrs.org unless the respondent requests confidentiality. Such requests will not normally be granted unless supported by a good reason, for example, commercial confidence. Please see our website for details on this policy and on how we use your personal data.

APPENDIX B—PROPOSED DOCUMENTATION LABELS 30
Introduction

Why is the IASB proposing changes to the IFRS® Accounting Taxonomy?

The International Accounting Standards Board (IASB) is proposing changes to the IFRS Accounting Taxonomy to reflect disclosure requirements arising from:

(a) International Tax Reform—Pillar Two Model Rules, which amended IAS 12 Income Taxes and was issued in May 2023;
(b) International Tax Reform—Pillar Two Model Rules, which amended Section 29 of the IFRS for SMEs Standard and was issued in September 2023;
(c) Supplier Finance Arrangements, which amended IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures and was issued in May 2023; and
(d) Lack of Exchangeability, which amended IAS 21 The Effects of Changes in Foreign Exchange Rates and was issued in August 2023.

International Tax Reform—Pillar Two Model Rules

The IASB issued International Tax Reform—Pillar Two Model Rules in May 2023. This amendment introduces a temporary exception to the accounting for deferred tax assets and liabilities related to Pillar Two income taxes. The amendment also adds targeted disclosure requirements for affected entities, including information about an entity’s exposure to Pillar Two income taxes (before Pillar Two legislation is effective) and current tax expense related to Pillar Two income taxes (when Pillar Two legislation is effective).

To reflect the disclosure requirements arising from International Tax Reform—Pillar Two Model Rules in the IFRS Accounting Taxonomy, the IASB proposes to add:

(a) one element to reflect the disclosure of the temporary exception to deferred tax accounting;
(b) two elements to reflect the disclosure requirements for periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect; and
(c) one element to reflect the disclosure requirements for periods when Pillar Two legislation is in effect (paragraphs 1–10).

The IASB also issued International Tax Reform—Pillar Two Model Rules, which amended Section 29 Income Tax of the IFRS for SMEs Standard, in September 2023. The amendment includes disclosure requirements for affected entities that are similar to some of the disclosure requirements in International Tax Reform—Pillar Two Model Rules, which amended IAS 12 Income Taxes. Accordingly, the IASB proposes to add similar elements to those proposed in paragraphs 4 and 10 (paragraphs 11–12).

Supplier Finance Arrangements

The IASB issued Supplier Finance Arrangements in May 2023. This amendment describes the characteristics of supplier finance arrangements that give rise to information needs of users of financial statements. The amendment also introduces requirements for an entity to disclose information about its supplier finance arrangements that enables users of
financial statements to assess the effects of those arrangements on the entity’s liabilities and cash flows and on the entity’s exposure to liquidity risk.

To reflect the disclosure requirements arising from Supplier Finance Arrangements in the IFRS Accounting Taxonomy, the IASB proposes to add:

(a) one element to reflect the disclosure objectives in paragraph 44F of IAS 7;
(b) two tables\(^1\) and two elements to reflect the disclosure requirements in paragraph 44H(a)–(b) of IAS 7; and
(c) one element and three example elements to reflect the disclosure requirements in paragraph 44H(c) of IAS 7 (paragraphs 13–26).

**Lack of Exchangeability**

The IASB issued *Lack of Exchangeability* in August 2023. This amendment seeks to improve the usefulness of information provided to users of financial statements by requiring entities to apply a consistent approach to determining whether a currency is exchangeable into another currency and the spot exchange rate to use when it is not.

To reflect the disclosure requirements arising from *Lack of Exchangeability* in the IFRS Accounting Taxonomy, the IASB proposes to add:

(a) one element to reflect the disclosure objective in paragraph 57A, and consequently the requirements in paragraphs A18–A20 of IAS 21;
(b) two tables to reflect specific disclosures required by paragraph A19 of IAS 21 in meeting the disclosure objective;
(c) one element and one table to reflect the additional disclosures required by paragraph A20 of IAS 21; and
(d) one element and one reference to an existing element to reflect the disclosure of the fact of early application of *Lack of Exchangeability* (paragraphs 27–41).

**Reading this proposed update**

This document uses taxonomy-specific terminology. For more information, please refer to the *Guide to Understanding the IFRS Taxonomy Update* and *Using the IFRS Taxonomy—A preparer’s guide*.\(^2\) Appendix A briefly explains IFRS Accounting Taxonomy terms used in this document.

In this Proposed IFRS Taxonomy Update, IFRS Accounting Taxonomy elements are shown in tables. New elements are shaded in green. Amended element labels or references are underlined to show added text and struck through to show deleted text. Existing elements provided for context only (with no proposed changes) use grey text.

Indents are used to show a taxonomy presentation (or calculation) parent–child relationship between IFRS Accounting Taxonomy elements.

---

1 Tables are logical groupings of IFRS Accounting Taxonomy axes, members and line items (see Appendix A).

2 The *Guide to Understanding the IFRS Taxonomy Update* is available at https://www.ifrs.org/content/dam/ifrs/standards/taxonomy/general-resources/understanding-ifrs-taxonomy-update.pdf.

In this document, the element label shown is the standard label, unless otherwise indicated.\(^{3}\)

**Documentation labels**

The IFRS Accounting Taxonomy includes documentation labels for elements to describe, in text, the accounting meaning of each element.

Documentation labels for proposed new elements are included in Appendix B. Documentation labels are also available as a separate linkbase in the IFRS Accounting Taxonomy files and the IFRS Taxonomy Illustrated in Microsoft Excel.

**IFRS Accounting Taxonomy files**

IFRS Accounting Taxonomy files for this proposed update are based on the IFRS Accounting Taxonomy 2023, published in March 2023.

**Effective date**

*International Tax Reform—Pillar Two Model Rules (Amendments to IAS 12):*

(a) applies immediately upon the issue of the amendments and retrospectively in accordance with IAS 8 for paragraphs 4A and 88A; and

(b) applies to annual reporting periods beginning on or after 1 January 2023 for paragraphs 888–88D. An entity is not required to disclose the information required by these paragraphs for any interim period ending on or before 31 December 2023.

*International Tax Reform—Pillar Two Model Rules (Amendments to Section 29 of the IFRS for SMEs Standard):*

(a) applies immediately upon the issue of the amendments and retrospectively in accordance with Section 10 Accounting Policies, Estimates and Errors for paragraphs 29.3A, 29.38, 29.42; and

(b) applies to annual reporting periods beginning on or after 1 January 2023 for paragraph 29.43.

*Supplier Finance Arrangements* applies to annual reporting periods beginning on or after 1 January 2024.

*Lack of Exchangeability* applies to annual reporting periods beginning on or after 1 January 2025.

Accordingly, the proposed elements and documentation labels will have an effective date in the IFRS Accounting Taxonomy files that corresponds to the effective date of the amendment to which they relate.

Earlier application of the amendments is permitted, and when an entity applies the amendments early, it shall use the related IFRS Accounting Taxonomy elements at the same time.

---

\(^{3}\) For more information on element labels, see Appendix A to this Proposed Update and the ‘Element labels’ section in *Using the IFRS Taxonomy—A preparer’s guide.*
Next steps

The IASB will analyse the comments on this Proposed IFRS Taxonomy Update and make the necessary amendments. After approval by the IASB, an IFRS Taxonomy Update will be published.
Invitation to comment

The IASB invites comments on this Proposed IFRS Taxonomy Update, particularly on the questions in this section. Comments are most helpful if they:

(a) respond to the questions as stated;
(b) specify the IFRS Accounting Taxonomy item, table or group of items to which they relate;
(c) contain a clear rationale; and
(d) include any alternative the IASB should consider, if applicable.

General comments on the IFRS Accounting Taxonomy as a whole or on any aspect of it are also welcome. However, any IFRS Accounting Taxonomy amendments resulting from such comments may be included in a subsequent update.

Questions for respondents

<table>
<thead>
<tr>
<th>Question 1—Adequate reflection of disclosure requirements arising from International Tax Reform—Pillar Two Model Rules</th>
</tr>
</thead>
</table>
| Do the proposed changes to the IFRS Accounting Taxonomy described in paragraphs 1–12 adequately reflect the disclosure requirements arising from:

(a) International Tax Reform – Pillar Two Model Rules (Amendments to IAS 12); and
(b) International Tax Reform – Pillar Two Model Rules (Amendments to Section 29 of the IFRS for SMEs Standard)?

If not, please specify what changes you suggest and why. |

<table>
<thead>
<tr>
<th>Question 2—Adequate reflection of disclosure requirements arising from Supplier Finance Arrangements</th>
</tr>
</thead>
</table>
| Do the proposed changes to the IFRS Accounting Taxonomy described in paragraphs 13–26 adequately reflect the disclosure requirements arising from Supplier Finance Arrangements?

If not, please specify what changes you suggest and why. |

<table>
<thead>
<tr>
<th>Question 3—Adequate reflection of disclosure requirements arising from Lack of Exchangeability</th>
</tr>
</thead>
</table>
| Do the proposed changes to the IFRS Accounting Taxonomy described in paragraphs 27–41 adequately reflect the disclosure requirements arising from Lack of Exchangeability?

If not, please specify what changes you suggest and why. |
Question 4—Appropriate use of element labels

Do the element labels proposed for the IFRS Accounting Taxonomy faithfully represent the meanings of the elements proposed to reflect amendments made by:

(a) *International Tax Reform—Pillar Two Model Rules (Amendments to IAS 12)* (paragraphs 1–10);
(b) *International Tax Reform—Pillar Two Model Rules (Amendments to Section 29 of the IFRS for SMEs Standard)*;
(c) *Supplier Finance Arrangements* (paragraphs 13–25); and
(d) *Lack of Exchangeability* (paragraphs 26–39)?

If not, please specify what changes you suggest and why.

---

Question 5—Appropriate use of documentation labels

The tables in Appendix B contain proposed documentation labels for the proposed new elements in the IFRS Accounting Taxonomy.

Do these proposed documentation labels correctly and clearly describe the accounting meanings of the elements proposed to reflect the amendments made by:

(a) *International Tax Reform—Pillar Two Model Rules (Amendments to IAS 12)*;
(b) *International Tax Reform—Pillar Two Model Rules (Amendments to Section 29 of the IFRS for SMEs Standard)*;
(c) *Supplier Finance Arrangements*; and
(d) *Lack of Exchangeability*?

If not, please specify what changes you suggest and why.

---

Deadline

The IASB will consider all written comments received by 4 December 2023.

How to comment

Please submit your comments electronically:

- Online: [https://www.ifrs.org/projects/open-for-comment/](https://www.ifrs.org/projects/open-for-comment/)
- By email: commentletters@ifrs.org

Your comments will be on the public record and posted on our website unless you request confidentiality and we grant your request. We do not normally grant such requests unless they are supported by a good reason, for example, commercial confidence. Please see our website for details on this policy and on how we use your personal data. If you would like to request confidentiality, please contact us at commentletters@ifrs.org before submitting your letter.
Proposed changes to the IFRS Accounting Taxonomy to reflect amendments arising from *International Tax Reform—Pillar Two Model Rules*

1. *International Tax Reform—Pillar Two Model Rules* amended IAS 12 *Income Taxes* to include targeted disclosure requirements for affected entities, including:

   (a) a statement that the entity has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes (paragraphs 4A and 88A);

   (b) information about the entity’s exposure in periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect (paragraphs 88C–88D); and

   (c) the current tax expense (income) related to Pillar Two income taxes in periods when Pillar Two legislation is in effect (paragraph 88B).

2. To reflect the disclosure requirements arising from *International Tax Reform—Pillar Two Model Rules* in the IFRS Accounting Taxonomy, the IASB proposes to add:

   (a) one element for the disclosure of the exception to deferred tax accounting (paragraph 4);

   (b) two elements for the disclosure requirements for periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect (paragraphs 5–9); and

   (c) one element for the disclosure requirements for periods when Pillar Two legislation is in effect (paragraph 10).

3. Typical Taxonomy modelling practice is to include new elements in the presentation group to which the new Standard or amendment relates. This practice would allow an entity to find these new elements along with other elements relating to disclosures required by that Standard. Accordingly, the IASB proposes to include the new elements arising from these disclosure requirements in the presentation group ‘[835110] Notes - Income taxes’.
Temporary exception to deferred tax accounting

The IASB proposes to add one text element to reflect the disclosure that the entity has applied the exception to deferred tax accounting described in paragraph 4A of IAS 12. A text element is appropriate for narrative disclosure requirements that are expected to be expressed in a free-text format.4

<table>
<thead>
<tr>

<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Statement that entity has applied exception to deferred tax accounting related to Pillar Two income taxes</td>
<td>T</td>
<td>D</td>
<td>IAS 12.88A</td>
</tr>
</tbody>
</table>

Disclosure requirements for periods before Pillar Two legislation is in effect

International Tax Reform—Pillar Two Model Rules amended IAS 12 to include paragraphs 88C–88D, which require an affected entity to disclose known or reasonably estimable information that helps users of financial statements understand the entity’s exposure to Pillar Two income taxes at the end of the reporting period. The amendment also included examples of information that could meet the disclosure objective and requirements in paragraphs 88C–88D:

International tax reform—Pillar Two model rules

... 88C In periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect, an entity shall disclose known or reasonably estimable information that helps users of financial statements understand the entity’s exposure to Pillar Two income taxes arising from that legislation.

88D To meet the disclosure objective in paragraph 88C, an entity shall disclose qualitative and quantitative information about its exposure to Pillar Two income taxes at the end of the reporting period. This information does not have to reflect all the specific requirements of the Pillar Two legislation and can be provided in the form of an indicative range. To the extent information is not known or reasonably estimable, an entity shall instead disclose a statement to that effect and disclose information about the entity’s progress in assessing its exposure.

4 This disclosure may also be modelled using categorical elements, such as a Boolean element. The IFRS Accounting Taxonomy does not currently use categorical elements. The IFRS Foundation will consider whether to use categorical elements in the IFRS Accounting Taxonomy in a separate, future consultation.
Examples illustrating paragraphs 88C–88D

Examples of information an entity could disclose to meet the objective and requirements in paragraphs 88C–88D include:

(a) qualitative information such as information about how an entity is affected by Pillar Two legislation and the main jurisdictions in which exposures to Pillar Two income taxes might exist; and

(b) quantitative information such as:

(i) an indication of the proportion of an entity’s profits that might be subject to Pillar Two income taxes and the average effective tax rate applicable to those profits; or

(ii) an indication of how the entity’s average effective tax rate would have changed if Pillar Two legislation had been in effect.

The IASB proposes to add one overall text block to reflect the disclosure of qualitative and quantitative information about its exposure to meet the disclosure objective for periods in which Pillar Two legislation is enacted or substantively enacted but not yet in effect.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of known or reasonably estimable information about exposure to Pillar Two income taxes</td>
<td>TB</td>
<td>D</td>
<td>IAS 12.88C IAS 12.88D</td>
</tr>
</tbody>
</table>

As an alternative, the IASB considered modelling separate elements for examples of qualitative and quantitative information an entity could disclose to meet the requirements in paragraphs 88C–88D. The IASB rejected this approach because:

(a) all information disclosed to comply with paragraphs 88C–88D of IAS 12 would be captured in the text block ‘Disclosure of known or reasonably estimable information about exposure to Pillar Two income taxes’;

(b) the information that entities disclose is expected to vary depending on an entity’s circumstances and assessments; and

(c) users may find it more useful to extract disclosures relating to the entity’s exposure to Pillar Two income taxes as a whole, instead of extracting individual components of the disclosures, which might not be comparable between entities.

Paragraph 88D states that known or reasonably estimable information can be provided in the form of an indicative range. Accordingly, if an entity discloses values in the form of a range, the entity would be able to use the existing ‘Range’ axis in the IFRS Accounting Taxonomy to tag the range of disclosed values.
To the extent information is not known or reasonably estimable, paragraph 88D requires an entity to instead disclose a statement to that effect, and to disclose information about the entity’s progress in assessing its exposure. The IASB proposes to add one text block element to reflect this disclosure requirement.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>

<td>D</td>
<td>IAS 12.88B</td>
</tr>
</tbody>
</table>

Amendments to the IFRS for SMEs Standard

The IASB also issued International Tax Reform—Pillar Two Model Rules, which amended Section 29 Income Tax of the IFRS for SMEs Standard. The amendment includes disclosure requirements for affected entities that are similar to some of the disclosure requirements in International Tax Reform—Pillar Two Model Rules, which amended IAS 12 Income Taxes.

International tax reform—Pillar Two model rules

29.42 An entity within the scope of Pillar Two legislation shall disclose that it has applied the exception to recognising and disclosing information about deferred tax assets and liabilities related to Pillar Two income taxes (see paragraph 29.3A).

29.43 An entity shall disclose separately its current tax expense (income) related to Pillar Two income taxes.

Accordingly, the IASB proposes to add two elements to the IFRS Accounting Taxonomy for the IFRS for SMEs Standard that are similar to the elements proposed in paragraphs 4 and 10.
Proposed changes to the IFRS Accounting Taxonomy to reflect amendments arising from Supplier Finance Arrangements

Disclosure of information relating to supplier finance arrangements

Supplier Finance Arrangements amended IAS 7 Statement of Cash Flows to require an entity to disclose information about its supplier finance arrangements that enables users to assess how those arrangements affect the entity’s liabilities, cash flows and exposure to liquidity risk (paragraph 44F of IAS 7).

The IASB proposes to add one overall text block to reflect the disclosure objective in paragraph 44F of IAS 7, and consequently the entire disclosure of supplier finance arrangements. This approach is consistent with typical Taxonomy modelling practice for situations in which pieces of information disclosed to meet a single disclosure objective are expected to be grouped together.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of supplier finance arrangements</td>
<td>TB</td>
<td>D</td>
<td>IAS 7.44F</td>
</tr>
</tbody>
</table>

Supplier Finance Arrangements amended IAS 7 to include paragraph 44H:

Supplier finance arrangements

... 44H To meet the objectives in paragraph 44F, an entity shall disclose in aggregate for its supplier finance arrangements:

(a) the terms and conditions of the arrangements (for example, extended payment terms and security or guarantees provided). However, an entity shall disclose separately the terms and conditions of arrangements that have dissimilar terms and conditions.

(b) as at the beginning and end of the reporting period:

(i) the carrying amounts, and associated line items presented in the entity’s statement of financial position, of the financial liabilities that are part of a supplier finance arrangement.

(ii) the carrying amounts, and associated line items, of the financial liabilities disclosed under (i) for which suppliers have already received payment from the finance providers.

(iii) the range of payment due dates (for example, 30–40 days after the invoice date) for both the financial liabilities disclosed under (i) and comparable trade payables that are not part of a supplier finance arrangement. Comparable trade payables are, for example, trade
payables of the entity within the same line of business or jurisdiction as the financial liabilities disclosed under (i). If ranges of payment due dates are wide, an entity shall disclose explanatory information about those ranges or disclose additional ranges (for example, stratified ranges).

(c) the type and effect of non-cash changes in the carrying amounts of the financial liabilities disclosed under (b)(i). Examples of non-cash changes include the effect of business combinations, exchange differences or other transactions that do not require the use of cash or cash equivalents (see paragraph 43).

To reflect the disclosure requirements in paragraph 44H of IAS 7, the IASB proposes to add:

(a) one text block to reflect the disclosure of the terms and conditions of supplier finance arrangements (paragraph 17);

(b) one table to reflect the disclosure of the carrying amounts of financial liabilities that are part of supplier finance arrangements (paragraph 18);

(c) one table to reflect the disclosure of the range of payment due dates and one text block to reflect the disclosure of payment ranges that are wide (paragraphs 19–21); and

(d) one text block and three monetary elements to reflect the disclosure of the type and effect of non-cash changes in the carrying amount of financial liabilities that are part of supplier finance arrangements (paragraph 22).

The IASB proposes to add one text block to reflect the disclosure of the terms and conditions of an entity’s supplier finance arrangements, including the disclosure of arrangements that have dissimilar terms and conditions.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of terms and conditions of supplier</td>
<td>TB</td>
<td>D</td>
<td>IAS 7.44H(a)</td>
</tr>
<tr>
<td>finance arrangements</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To reflect the disclosure of the carrying amount of financial liabilities that are part of supplier finance arrangements, the IASB proposes to:

(a) add one text block for the disclosure of the carrying amounts of financial liabilities that are part of an entity’s supplier finance arrangements. Typical Taxonomy practice is to create a text block element that contains the table elements, including the axis, member and line item elements.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of financial liabilities that are part</td>
<td>TB</td>
<td>D</td>
<td>IAS 7.44H(b)(i)</td>
</tr>
<tr>
<td>of supplier finance arrangements</td>
<td></td>
<td></td>
<td>IAS 7.44H(b)(ii)</td>
</tr>
</tbody>
</table>
(b) add a new axis to represent the line items in the entity’s statement of financial position in which the financial liabilities that are part of supplier finance arrangements are presented. If an entity has included financial liabilities that are part of supplier finance arrangements in more than one line in the statement of financial position, the entity would create an extension member for each line item in the statement of financial position in which those financial liabilities are presented. The entity would then combine each extension member with the new line items (paragraph 18(c)) to tag the information relating to the carrying amount of financial liabilities that are part of supplier finance arrangements.

Axis and members

<table>
<thead>
<tr>
<th>Element label</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>

<td>D</td>
<td>IAS 7.44H(b)(i)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>IAS 7.44H(b)(ii)</td>
</tr>
</tbody>
</table>

(c) add two monetary elements to reflect the disclosure of the carrying amount of financial liabilities that are part of supplier finance arrangements and the carrying amount of those liabilities for which the suppliers have already received payment, at the beginning and end of the reporting period. Typical Taxonomy modelling practice is to use the same element for reporting amounts at the beginning and end of a reporting period. The IASB proposes to add a period start label (‘at beginning of period’) and period end label (‘at end of period’) to the line items. These labels do not alter the accounting meaning of the elements but are used for presentation purposes when displaying IFRS Accounting Taxonomy content.

continued...
The IASB considered whether to use a general axis to represent the location in the statement of financial position in which financial liabilities that are part of supplier finance arrangements are presented. However, one of the disadvantages of a general axis is that it can be used more broadly and could result in diversity in how financial information is tagged. The IASB therefore proposes to create a specific axis that relates only to the requirements of paragraph 44H(b)(ii) of IAS 7.

To reflect the disclosure of the range of payment due dates related to financial liabilities that are part of supplier finance arrangements, the IASB proposes to:

(a) add one text block for the disclosure of the range of payment due dates related to financial liabilities that are part of supplier finance arrangements, in accordance with typical Taxonomy modelling practice (paragraph 18(a)).

(b) add the existing ‘Range’ axis and related members in the IFRS Accounting Taxonomy to reflect the top and bottom values of the range of payment due dates. If an entity has disclosed additional ranges as permitted by paragraph 44H(b)(iii), the entity would create extension members to represent those additional ranges.

---

For simplicity, this table shows only the references added because of the proposed amendments. No other references will be changed by these proposals.
add two new elements for the payment due dates, expressed as a number of days after invoice date, for financial liabilities that are part of supplier finance arrangements and comparable trade payables that are not part of those arrangements, at the beginning and end of the reporting period, in accordance with typical Taxonomy modelling practice (paragraph 18(c)).

The IASB proposes to add one text block to reflect the disclosure of the type and effect of non-cash changes to financial liabilities that are part of supplier finance arrangements and three monetary line items to reflect possible examples of these non-cash changes, in accordance with paragraph 44H(c) of IAS 7. If an entity has disclosed additional types of non-cash changes to financial liabilities that are part of supplier finance arrangements, the entity would create extension elements to represent those non-cash changes.

continued...
In accordance with typical Taxonomy modelling practice (paragraph 3), the IASB proposes to include the new elements arising from the disclosure requirements in Supplier Finance Arrangements in the presentation group ‘[851100] Notes – Cash flow statement’.

**Disclosure of the fact of early application**

Supplier Finance Arrangements shall be applied for annual reporting periods beginning on or after 1 January 2024.

Early application of the amendments is permitted. If an entity applies these amendments for an earlier period, it shall disclose that fact (paragraph 62 of IAS 7, as introduced in May 2023).

The IASB considered modelling the disclosure of the fact of early application. However, the IASB rejected this approach because Supplier Finance Arrangements will already be in effect before the proposed elements are included in the IFRS Accounting Taxonomy. Accordingly, modelling these elements would not be useful to preparers or users of financial statements.

**Proposed changes to the IFRS Accounting Taxonomy to reflect amendments arising from Lack of Exchangeability**

Lack of Exchangeability amended IAS 21 The Effects of Changes in Foreign Exchange Rates to include requirements for an entity to disclose information that enables users to understand how a currency not being exchangeable into another currency affects, or is expected to affect, the entity’s financial performance, financial position and cash flows:

**Disclosure**

...  

When an entity estimates a spot exchange rate because a currency is not exchangeable into another currency (see paragraph 19A), the entity shall disclose information that enables users of its financial statements to understand how the currency not being exchangeable into the other currency affects, or is expected to affect, the entity’s financial performance, financial position and cash flows. To achieve this objective, an entity shall disclose information about:

(a) the nature and financial effects of the currency not being exchangeable into the other currency;

(b) the spot exchange rate(s) used;

(c) the estimation process; and
Disclosure when a currency is not exchangeable

A18
An entity shall consider how much detail is necessary to satisfy the disclosure objective in paragraph 57A. An entity shall disclose the information specified in paragraphs A19–A20 and any additional information necessary to meet the disclosure objective in paragraph 57A.

A19
In applying paragraph 57A, an entity shall disclose:

(a) the currency and a description of the restrictions that result in that currency not being exchangeable into the other currency;

(b) a description of affected transactions;

(c) the carrying amount of affected assets and liabilities;

(d) the spot exchange rates used and whether those rates are:

(i) observable exchange rates without adjustment (see paragraphs A12–A16); or

(ii) spot exchange rates estimated using another estimation technique (see paragraph A17);

(e) a description of any estimation technique the entity has used, and qualitative and quantitative information about the inputs and assumptions used in that estimation technique; and

(f) qualitative information about each type of risk to which the entity is exposed because the currency is not exchangeable into the other currency, and the nature and carrying amount of assets and liabilities exposed to each type of risk.

A20
When a foreign operation's functional currency is not exchangeable into the presentation currency or, if applicable, the presentation currency is not exchangeable into a foreign operation's functional currency, an entity shall also disclose:

(a) the name of the foreign operation; whether the foreign operation is a subsidiary, joint operation, joint venture, associate or branch; and its principal place of business;

(b) summarised financial information about the foreign operation; and

(c) the nature and terms of any contractual arrangements that could require the entity to provide financial support to the foreign operation, including events or circumstances that could expose the entity to a loss.
To reflect the disclosure requirements arising from *Lack of Exchangeability* in the IFRS Accounting Taxonomy, the IASB proposes to add:

(a) one overall text block element to reflect the disclosure objective in paragraph 57A, and consequently the requirements in paragraphs A18–A20 of IAS 21 (paragraphs 30–31);

(b) one table to reflect the disclosure of the carrying amount of affected assets or liabilities required by paragraph A19(c) of IAS 21 (paragraphs 32–33);

(c) one table to reflect the disclosure of the types of risks to which the entity is exposed because a currency is not exchangeable into another currency required by paragraph A19(f) of IAS 21 (paragraph 34); and

(d) one text block element and one table to reflect the additional disclosures required by paragraph A20 of IAS 21 (paragraphs 35–37).

In accordance with typical Taxonomy modelling practice (paragraph 3), the IASB proposes to include the new elements arising from the disclosure requirements in *Lack of Exchangeability* in the presentation group ‘[842000] Notes - Effects of changes in foreign exchange rates’.

**Disclosure when a currency is not exchangeable**

Consistent with typical Taxonomy modelling practice (paragraph 14), the IASB proposes to add one overall text block to reflect the disclosure objective in paragraph 57A of IAS 21. Paragraphs A18–A20 of IAS 21 specify how an entity applies paragraph 57A. Consequently, the proposed text block element would be used to tag the entire disclosure of information when a currency is not exchangeable into another currency, including information disclosed in accordance with paragraphs A18–A20 of IAS 21.

The information disclosed in accordance with subparagraphs A19(a)–(b) and A19(d)–(e) of IAS 21 would be captured in the overall text block. In addition to this overall text block, the IASB proposes adding elements to address specific disclosure requirements, such as the carrying amounts of assets and liabilities affected by a currency not being exchangeable into another currency and the types of risks to which the entity is exposed because a currency is not exchangeable into another currency (paragraphs 32–34).

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of information when currency is not exchangeable into another currency</td>
<td>TB</td>
<td>D</td>
<td>IAS 21.57A</td>
</tr>
</tbody>
</table>

Paragraph A19(c) of IAS 21 requires an entity to disclose the carrying amount of affected assets and liabilities when a currency is not exchangeable into another currency. The IFRS Accounting Taxonomy currently includes an ‘Assets and liabilities’ axis that may be used to tag disclosed information relating to a specific asset or liability. Accordingly, the IASB proposes to create one table with this existing axis and two new monetary elements to reflect the disclosure of the carrying amount of affected assets or liabilities.
To reflect the disclosure requirement in paragraph A19(c) of IAS 21, the IASB proposes to:

(a) add one text block for the disclosure of the assets and liabilities that are affected by a currency not being exchangeable into another currency.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disclosure of assets and liabilities affected by currency not being exchangeable</td>
<td>TB</td>
<td>D</td>
<td>IAS 21.A19(c)</td>
</tr>
</tbody>
</table>

(b) add the existing ‘Assets and liabilities’ axis and related members in the IFRS Accounting Taxonomy to reflect the disclosure of information relating to specific assets or liabilities. An entity would create an extension member for each separately disclosed asset or liability that has been affected by a currency not being exchangeable into another currency. The entity would then combine each of these extension members with the new line items (paragraph 33(c)) to tag the related disclosures.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assets and liabilities (A)</td>
<td>D</td>
<td>IAS 21.A19(c)</td>
</tr>
<tr>
<td>Assets and liabilities (DM)</td>
<td>D</td>
<td>IAS 21.A19(c)</td>
</tr>
</tbody>
</table>

(c) add two new monetary elements for the carrying amount of affected assets or liabilities when a currency is not exchangeable into another currency.

<table>
<thead>
<tr>
<th>Element label</th>
<th>ET</th>
<th>ER</th>
<th>Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>Carrying amount of assets affected by currency not being exchangeable</td>
<td>M</td>

</tr>
<tr>
<td>Carrying amount of liabilities affected by currency not being exchangeable</td>
<td>M</td>
<td>D</td>
<td>IAS 21.A19(c)</td>
</tr>
</tbody>
</table>

Paragraph A19(f) of IAS 21 requires an entity to disclose information for each type of risk to which the entity is exposed because a currency is not exchangeable into another currency. Accordingly, the IASB proposes to:

(a) add one text block for the disclosure of information about each type of risk to which the entity is exposed because a currency is not exchangeable into another currency:

---

For simplicity, this table shows only the references added because of the proposed amendments. No other references will be changed by these proposals.
Paragraph A20 of IAS 21 requires an entity to disclose additional information, including summarised financial information about a foreign operation, when a foreign operation’s functional currency is not exchangeable into the entity’s presentation currency or, if applicable, the presentation currency is not exchangeable into a foreign operation’s functional currency.

The IASB proposes to add one text block element to reflect this disclosure of additional information when a foreign operation’s functional currency is not exchangeable into the entity’s presentation currency or, if applicable, the presentation currency is not exchangeable into a foreign operation’s functional currency.

---

For simplicity, this table shows only the references added because of the proposed amendments. No other references will be changed by these proposals.
Disclosure of information when foreign operation’s functional currency is not exchangeable into presentation currency

The requirement for an entity to provide summarised financial information about the foreign operation in paragraph A20(b) of IAS 21 is similar to disclosure requirements in IFRS 12 Disclosure of Interests in Other Entities. The IASB proposes to use a Taxonomy modelling approach that is similar to the modelling approach used to reflect the similar disclosure requirements in IFRS 12. Accordingly, the IASB proposes to:

(a) add one text block for the disclosure of summarised financial information about the foreign operation. Preparers would use the text block element proposed in paragraph 36 to tag the whole disclosure required by paragraph A20 of IAS 21 and would also use the proposed table text block to tag the disclosed summarised financial information of the foreign operation whose functional currency is not exchangeable into the presentation currency.

(b) add a new axis to represent the foreign operation whose functional currency is not exchangeable into the presentation currency. The entity would create an extension member for each foreign operation as a child element to the ‘Foreign operations whose functional currency is not exchangeable into presentation currency’ member whose functional currency is not exchangeable into the presentation currency. The entity would then combine the extension member with existing Taxonomy line items to tag the disclosed summarised financial information.

</tbody>
</table>
Disclosure of the fact of early application

Lack of Exchangeability shall be applied for annual reporting periods beginning on or after 1 January 2025.

Early application of the amendments is permitted. If an entity applies these amendments for an earlier period, it shall disclose that fact (paragraphs 60L of IAS 21, as introduced in August 2023).

The IASB has an established Taxonomy practice for modelling the disclosure of the fact of early application of new Standards and amendments. This Taxonomy modelling allows an entity to combine the line item ‘Description of fact that new or amended IFRS Standard is applied early’ and the related member in the axis ‘Initially applied IFRSs’ to tag the disclosure of the fact of early application of a new Standard or amendment.

The IASB proposes, therefore, to add a reference to paragraph 60L of IAS 21 to the line item ‘Description of fact that new or amended IFRS Standard is applied early’ and add a member to the ‘Initially Applied IFRSs’ axis in the table ‘Disclosure of initial application of standards or interpretations’ in the presentation group ‘[811000] Notes - Accounting policies, changes in accounting estimates and errors’.

Appendix A—IFRS® Accounting Taxonomy content terminology

This appendix briefly explains the IFRS Accounting Taxonomy terms used in this document.

<table>
<thead>
<tr>
<th>Core content—IFRS Accounting Taxonomy elements</th>
<th>These IFRS Accounting Taxonomy elements have:</th>
</tr>
</thead>
<tbody>
<tr>
<td>The IFRS Accounting Taxonomy contains elements that represent disclosures in financial statements prepared in accordance with IFRS Accounting Standards. These elements are described using:</td>
<td>• element names and element identifiers—unique computer tags used to identify and mark up the data.</td>
</tr>
<tr>
<td>• line items—which represent the accounting concepts being reported. They can be either numerical, for example, ‘Assets’, ‘Property, plant and equipment’; or narrative, reflecting the figures and narrative reported, for example, ‘Description of accounting policy for government grants’.</td>
<td>• element standard labels—human-readable names reflecting the accounting meaning of an element. Some elements have additional labels that provide more specific descriptions to show a total (total label), for example, or to distinguish between opening and closing balances (period start and end labels). Such additional labels do not alter the accounting meaning of the element but are used for displaying IFRS Accounting Taxonomy presentation relationships.</td>
</tr>
<tr>
<td>• axes and members—information categories and components that accounting concepts can be broken down into or reported by, for example, ‘Classes of property, plant and equipment’. Axes in the IFRS Accounting Taxonomy have a default member that applies whenever a preparer does not combine a line item with a specific member to tag the value of a disclosure.</td>
<td>• element types (ET)—categories of permitted data values, for example, text (T), text block (TB), monetary (M), decimal (Dec), percentage (Per) and duration (Dur).</td>
</tr>
<tr>
<td>• tables—logical groupings of IFRS Accounting Taxonomy axes, members and line items.</td>
<td>• text element types are used for narrative disclosures. They are also used when IFRS Accounting Standards do not specify the details of a disclosure requirement, but a preparer is expected to express that disclosure requirement in a free-text format.</td>
</tr>
<tr>
<td>continued...</td>
<td>• text block element types are used for a set of information that may include, for example, numerical disclosures, narrative explanations and tables.</td>
</tr>
</tbody>
</table>
Core content—IFRS Accounting Taxonomy elements

- **element properties**, such as:
  - the **period**—which indicates whether the element is expected to be reported for a period of time (duration) or at a particular point in time (instant); and
  - the **balance**—which indicates whether the element is generally expected to be reported as a credit or a debit.

Supporting content—Documentation and references for IFRS Accounting Taxonomy elements

The IFRS Accounting Taxonomy provides supporting content explaining the **accounting meaning** of an element.

This content includes:

- **references**—which link an element to the authoritative literature, for example, IFRS 15 *Revenue from Contracts with Customers*.

- **element reference types (ER)**—which define the source of an element, for example, disclosure (D), example (E) and common practice (CP).

- **documentation labels**—which provide a textual definition of each element. The sources of these definitions are the IFRS Accounting Standards and their accompanying materials, when available.

- **guidance labels**—which are implementation notes that help preparers to correctly use IFRS Accounting Taxonomy elements in an electronic report.
### Supporting content—Relationships between IFRS Accounting Taxonomy elements (linkbases)

| The IFRS Accounting Taxonomy calculation linkbase explains how elements may relate mathematically to each other. | For example, this content includes:  
- summations of elements to a total or subtotal; and  
- formulas to show that an element is a ratio of other taxonomy elements. |
|---|---|
| The IFRS Accounting Taxonomy uses the presentation linkbase to provide presentation views under which the line items, axes and members (or a combination of these elements as tables) have been grouped. These presentation views enable human-readable viewing and navigation of the IFRS Accounting Taxonomy. | The IFRS Accounting Taxonomy has specific presentation elements:  
- headings (abstract elements); and  
- presentation groups.  
These elements are not used when tagging financial statements. These headings and presentation groups also have standard labels. |
| The IFRS Accounting Taxonomy uses the definition linkbase to provide views under which the combined line items, axes and members (tables) have been grouped. These views enable the computer-readable use of the IFRS Accounting Taxonomy. | For example, the content includes:  
- a definition for each table; and  
- a default member for each axis. |
Appendix B—Proposed documentation labels

This appendix shows the proposed documentation labels for the new IFRS Accounting Taxonomy elements.
