This Profile provides information about the application of IFRS® Standards (Standards) in Norway. The Standards are developed and issued in the public interest by the International Accounting Standards Board (IASB). The IASB is the standard-setting body of the IFRS Foundation (Foundation), an independent, private sector, not-for-profit organisation.

The Foundation has prepared this Profile based on information from various sources. The starting point was the answers provided by standard-setting and other bodies in response to surveys the Foundation conducted on the application of the Standards around the world. The Foundation drafted the profile and invited the respondents to the survey. The Foundation also invited others (including regulators and international audit firms) to review the drafts. Their comments are reflected in this Profile.

The purpose of the Foundation’s Jurisdictional Profiles is to illustrate only the extent of implementation of the Standards across the globe. The Profiles do not reflect the intellectual property licensing status of the Standards within any given jurisdiction. The Standards are protected by copyright and are subject to licensing arrangements agreed upon within their jurisdiction. For further information, please contact Licences@ifrs.org.

COMMITMENT TO GLOBAL FINANCIAL REPORTING STANDARDS

Has the jurisdiction made a public commitment in support of moving towards a single set of high quality global accounting standards? Yes. As a member of the European Economic Area, Norway is subject to the European Union Regulations and Directives, including the IAS Regulation. Refer to the IAS Regulation adopted by the European Union in 2002.
Has the jurisdiction made a public commitment towards IFRS Standards as that single set of high quality global accounting standards?

Yes. As a member of the European Economic Area, Norway is subject to the European Union Regulations and Directives, including the IAS Regulation. Refer to the IAS Regulation adopted by the European Union in 2002.

What is the jurisdiction’s status of adoption?

Norway has already adopted IFRS Standards as a requirement for all or some companies.

Additional comments provided on the adoption status?

IFRS Standards as adopted by the EU are required for the consolidated financial statements of all companies whose securities trade in a regulated market and for the consolidated financial statements of all other companies on a voluntary basis.

In Norway, the following are regulated markets:

- Fish Pool ASA
- Norexco ASA
- NASDAQ Oslo ASA
- Oslo AXESS
- Oslo Børs ASA

Norway used the option under the EU IAS Regulation to:

- Require IFRS Standards as adopted by the EU in the separate company financial statements of companies whose securities trade in a regulated market but that do not prepare consolidated financial statements because they have no subsidiaries.
- Permit IFRS Standards as adopted by the EU in the separate company financial statements of companies whose securities trade in a regulated market.
- Permit IFRS Standards as adopted by the EU in both the consolidated and separate company accounts of companies that do not trade in a regulated market.

When IFRS Standards as adopted by the EU were implemented for listed companies, based on EU/EEC requirements, it was stated in the preparatory documents that IAS/IFRS Standards should continue to be basis for development of Norwegian accounting standards, whereas consideration of the special needs for small companies should be taken care of by developing separate standards for small entities.

If the jurisdiction has NOT made a public statement supporting the move towards a single set of accounting standards and/or towards IFRS Standards as that set of standards, explain the jurisdiction’s general position towards the adoption of IFRS Standards in the jurisdiction.

Not applicable.

EXTENT OF IFRS APPLICATION

For DOMESTIC companies whose debt or equity securities trade in a public market in the jurisdiction:

Are all or some domestic companies whose securities trade in a public market either required or permitted to use IFRS

Yes.
Standards in their consolidated financial statements?

If YES, are IFRS Standards REQUIRED or PERMITTED?

Required. In accordance with the IAS Regulation, IFRS Standards as adopted by the EU are required for the consolidated financial statements of all European companies whose debt or equity securities trade in a regulated market in Norway.

Does that apply to ALL domestic companies whose securities trade in a public market, or only SOME? If some, which ones?

All Norwegian companies whose securities are traded at ‘regulated markets’ in Norway (Oslo Børs, Oslo Axess). It does not apply to Norwegian companies whose securities are traded at Merkur Market (a Norwegian market place which is not a ‘regulated market’)

Are IFRS Standards also required or permitted for more than the consolidated financial statements of companies whose securities trade in a public market?

Yes.

For instance, are IFRS Standards required or permitted in separate company financial statements of companies whose securities trade in a public market?

In their separate company financial statements, companies whose securities trade in a regulated market may choose:

- IFRS as adopted by the EU;
- existing local GAAP; or
- accounting standards prescribed in a regulation developed by the Ministry of Finance. Those standards are basically full IFRS Standards in terms of recognition and measurement (with a few modifications) but with simplified disclosures.

Note, however, that IFRS Standards as adopted by the EU are required in the financial statements of a company whose securities trade in a regulated market but that does not have any subsidiaries (in which case the financial statements are not consolidated financial statements).

For instance, are IFRS Standards required or permitted for companies whose securities do not trade in a public market?

In both their consolidated and separate company financial statements, companies whose securities do not trade in a regulated market may choose:

- IFRS Standards as adopted by the EU;
- existing local GAAP; or
- accounting standards prescribed in a regulation developed by the Ministry of Finance. Those standards are basically full IFRS Standards in terms of recognition and measurement (with a few modifications) but with simplified disclosures.

On 22 September 2015, the Norwegian Ministry of Finance issued for comment an exposure draft of a new Accounting Act for Norway that would modify the accounting requirements for companies whose securities do not trade in a regulated market.

On 24 June 2016, the Ministry published a second set of proposals that complements the September 2015 proposals.

If the jurisdiction currently does NOT require or permit the use of IFRS Standards for domestic companies whose securities trade in a public market, are there any plans to permit or require IFRS Standards for such companies in the future?

Not applicable.

For FOREIGN companies whose debt or equity securities trade in a public market in the jurisdiction:

Are all or some foreign companies whose securities trade in a public market either

Yes.
**REQUIRED or PERMITTED to use IFRS Standards in their consolidated financial statements?**

If YES, are IFRS Standards REQUIRED or PERMITTED in such cases?

Required for some and permitted for others. Foreign companies whose securities trade in a regulated market in Norway (and generally in the EU and EEA) are required to report under IFRS Standards as adopted by the EU for their consolidated financial statements unless the European Commission has deemed their local accounting standards to be equivalent to IFRS, in which case they may use their local standards. Further details may be found on the 'Financial Reporting' page of the European Commission’s website.

Does that apply to ALL foreign companies whose securities trade in a public market, or only SOME? If some, which ones?

All.

### IFRS ENDORSEMENT

**Which IFRS Standards are required or permitted for domestic companies?**

IFRS as adopted by the European Union, which are IFRS as issued by the Board with some limited modifications such as the temporary ‘carve-out’ from IAS 39. However, the resulting financial statements of the majority of companies can still be in full compliance with IFRS.

The auditor’s report and/or the basis of presentation footnote states that financial statements have been prepared in conformity with:

IFRS Standards as adopted by the European Union.

Does the auditor’s report and/or the basis of preparation footnote allow for ‘dual reporting’ (conformity with both IFRS Standards and the jurisdiction’s GAAP)?

Yes.

Are IFRS Standards incorporated into law or regulations?

Yes.

If yes, how does that process work?

The process is described in the Profile of the European Union.

If no, how do IFRS Standards become a requirement in the jurisdiction?

Not applicable.

Does the jurisdiction have a formal process for the ‘endorsement’ or ‘adoption’ of new or amended IFRS Standards (including Interpretations) in place?

Yes.

If yes, what is the process?

The process is described in the Profile of the European Union. Because Norway is not an EU member, in addition to the formal EU endorsement process, according to the EEC-agreement the EU regulations have to be enacted into Norwegian law by issuing changes to the IFRS-bylaw to the Norwegian Accounting Act.

If no, how do new or amended IFRS Standards become a requirement in the jurisdiction?

Not applicable.

Has the jurisdiction eliminated any accounting policy options permitted by IFRS Standards and/or made any modifications to any IFRS Standards?

Yes.

If yes, what are the changes?

Details are in the Profile of the European Union.
Other comments regarding the use of IFRS Standards in the jurisdiction?
None.
