## Introduction

---

XBRL (eXtensible Business Reporting Language) is a standard that is used to communicate financial information between preparers and users of financial statements. The IFRS Foundation is responsible for developing the XBRL representation of the IFRS Accounting Standards including IAS Standards, IFRIC Interpretations and the *IFRS for SMEs* Standard – issued by the International Accounting Standards Board, known as the IFRS Accounting Taxonomy.

Physically, the IFRS Accounting Taxonomy is composed of a set of electronic XBRL files so it can be difficult for those not familiar with XBRL to view and understand the structure of the IFRS Accounting Taxonomy without the use of specialised software. Consequently, the IFRS Foundation has published the IFRS Taxonomy Illustrated to facilitate understanding of the IFRS Accounting Taxonomy and its structure, and ultimately to assist with the tagging of financial statements prepared using IFRS Accounting Standards.

The IFRS Taxonomy Illustrated does not require knowledge of XBRL because it presents the structure of the IFRS Accounting Taxonomy in a simplified, visual format. The IFRS Taxonomy Illustrated sets out:

- The hierarchy of the IFRS Accounting Taxonomy and the elements within it.
- The required format of these elements, such as text, monetary values, etc.
- The reference to IFRS Accounting Standards that these elements relate to.

The IFRS Taxonomy Illustrated also contains links to the IFRS Standards Navigator, the IFRS Foundation's online subscription service that contains the electronic consolidated editions of the IFRS Accounting Standards and accompanying documents.

This version of the IFRS Taxonomy Illustrated reflects the IFRS Accounting Taxonomy 2022.<sup>1</sup>

These numbers are artificial and provide viewing and sorting functionality (they are not related to the *IFRS for SMEs* Standard).
- Rows below column headings represent the elements belonging to this section.
