This paper has been prepared for discussion at a public meeting of the International Accounting Standards Board (IASB). This paper does not represent the views of the IASB or any individual IASB member. Any comments in the paper do not purport to set out what would be an acceptable or unacceptable application of IFRS<sup>®</sup> Accounting Standards or the *IFRS for SMEs*<sup>®</sup> Accounting Standard. ## Purpose of this meeting

1. The purpose of this meeting is for the IASB to continue its redeliberations of the proposals in the Exposure Draft *Third edition of the IFRS for SMEs Accounting Standard* (the Exposure Draft).
2. In this paper, the term SMEs refers to entities that are eligible to apply the *IFRS for SMEs* Accounting Standard (the Standard).

## Overview of agenda papers for this meeting

3. The agenda papers for this meeting are:
  - (a) Agenda Paper 30A Proposed amendments to Section 9 *Consolidated and Separate Financial Statements*
  - (b) Agenda Paper 30B Proposed amendments to Section 19 *Business Combinations and Goodwill*
  - (c) Agenda Paper 30C Proposed revised Section 23 *Revenue from Contracts with Customers*—Redeliberation topics

## Applying the alignment approach to problems addressed in IFRS Accounting Standards

4. In September 2022, the IASB published the Exposure Draft using the alignment approach. The alignment approach treats alignment with full IFRS Accounting Standards as the starting point for developing the Standard, and applies the principles of relevance to SMEs, simplicity and faithful representation, including the assessment of costs and benefits, in determining whether and how that alignment should take place. The approach applies these principles as follows:
- (a) relevance to SMEs is determined by assessing whether the problem addressed by an IFRS Accounting Standard or amendment to an IFRS Accounting Standard would make a difference in the decisions of users of financial statements prepared applying the *IFRS for SMEs* Standard.
  - (b) applying the principle of simplicity involves looking at the IFRS accounting requirements that have satisfied the relevance condition and then assessing what simplifications are appropriate. For any simplifications made, the IASB would then consider the principle of faithful representation.
  - (c) the principle of faithful representation is intended to help the IASB assess whether financial statements prepared applying the *IFRS for SMEs* Accounting Standard would faithfully represent the substance of economic phenomena in words and numbers. Simplifications that would result in financial statements that do not meet this criterion could damage the quality of information reported to users.

## Background to this comprehensive review

5. In January 2020, the IASB published Request for Information *Comprehensive Review of the IFRS for SMEs Standard* (Request for Information) as a first step in its second comprehensive review. The objective of the Request for Information was to seek views on whether and how the IASB should amend the Standard, including views on the IASB's proposed alignment approach (see paragraph 4 of this paper).

6. Overall, stakeholders who provided feedback on the alignment approach agreed with continuing to base the Standard on full IFRS Accounting Standards. Some respondents queried whether the alignment principles appropriately assessed the costs and benefits of any possible amendment to the Standard, considering the limited resources and capabilities of SMEs, and the IASB used this feedback to refine the alignment approach.
7. In September 2022, the IASB published the Exposure Draft using the alignment approach. The Exposure Draft was open for comment for 180 days, which ended on 7 March 2023. The IASB received comprehensive feedback on the IASB's approach to this review and how to align the Standard with individual IFRS Accounting Standards through extensive outreach during the comment period on the Request for Information. This enabled a more targeted approach to obtaining feedback on the Exposure Draft. In particular, the Exposure Draft asked specific questions about the issues that had been more contentious in developing the Exposure Draft.
8. At its June 2023 meeting, the IASB discussed the feedback on the Exposure Draft and redeliberated the proposed clarification to the definition of public accountability.
9. The SME Implementation Group (SMEIG) met on 13 July 2023 to discuss the feedback on the Exposure Draft and provide advice to the IASB. The [minutes from the SMEIG meeting](#) are available on the IFRS Foundation website. The staff present the advice from the SMEIG when the IASB redeliberates the related topics in the Exposure Draft.
10. At its September 2023 meeting, the IASB discussed, among other topics, its project plan, staff research on the characteristics of SMEs and its approach to updating the *IFRS for SMEs* educational modules. At its October 2023 to January 2024 meetings, the IASB continued to redeliberate the proposals in the Exposure Draft. The IASB's tentative decisions to date on the proposals in the Exposure Draft are set out in the appendix to this paper.

- 
11. At its October 2023 meeting, the IASB tentatively decided to publish an addendum to the Exposure Draft *Third Edition of the IFRS for SMEs Accounting Standard*. The addendum will propose amendments to the Standard to align with the requirements in full IFRS Accounting Standards on supplier finance arrangements and lack of exchangeability. The IASB aims to complete the redeliberations on the proposals in the addendum before it issues the third edition of the Standard. The [Addendum to the Exposure Draft Third edition of the IFRS for SMEs Accounting Standard](#) is a separate project on the IASB's workplan.

### Next steps

12. The IASB will continue to redeliberate the proposals in the Exposure Draft as set out in its project plan. Furthermore, following its tentative decision in January 2024 to require SMEs that provide financing to customers as one of their primary businesses to apply an expected credit loss model, the IASB will consider the possible implications of incorporating this model in the Standard.
13. The third edition of the Standard is expected to be issued in H2 2024.
